

2023 GOVERNMENT DONATIONS SCHEME, CHROME BOOKS AT ŌTŪMOETAI INTERMEDIATE SCHOOL AND LOOKING AHEAD TO SECONDARY SCHOOL

A Budget 2019 initiative saw Decile 1-7 state and state integrated Boards of Trustees able to choose to receive a \$150 per student, per year payment instead of seeking donations from parents. As a result, the Ōtūmoetai Intermediate School Board of Trustees resolved to opt into the Government School Donations Scheme for 2020 and this will continue for 2023. Therefore, we will not be requesting school donations for the delivery of the New Zealand Curriculum at our school for 2023.

This means that in 2023, the Board will not charge parents for the following ICT items:

- Internet charges for curriculum use.
- Access to the school ICT network.
- Use of school hardware.
- Software or software licenses for core curriculum programmes.

These items will all be provided at no cost to all students who attend our school in 2023.

BYOD (Bring Your Own Devices)

The school will continue to encourage students to bring their own device to school and is making the following changes to how this will operate in 2023 and 2024. This is the result of a changing educational environment where all Tauranga Secondary Schools require their year 9 students to have a Chromebook on entry. This is in anticipation of NCEA examinations being carried out online.

In line with Ōtūmoetai Intermediate School's Inclusive Education policy, our goal is to shift to an organisation where student access to Chromebooks is more equitable and all students have a sense of belonging.

As a school, we want to equip all our young people with the right set of skills for whatever path they choose to follow.

We live in a 'fast evolving digital world' that is characterised by changing ways of living and working.

Digital technologies are used everywhere: we have automatic scanners at the supermarkets to buy our food, drones helping farmers to know when to water their crops, and surgeons using robots to mend hearts.

The challenge for educators is to equip all of the students of Aotearoa with the understanding of how digital technologies work so they can make life better.

We want all of our young people to have the knowledge and skills to deal with new problems and opportunities as they arise, and be safe while doing so.

What is Planned:

2023 We are removing digital classes but retaining BYOD for Chromebooks. We are encouraging all year 8 students to purchase their own Chromebooks.

Year 7 students are also able to BYOD Chromebooks and the school will focus on providing equitable Chromebook access to students unable to purchase their own device.

The school intends to purchase more Chromebooks for students to use and is aligning our year 8 Chromebook policy with that of Ōtūmoetai College, Tauranga Boys College, and Tauranga Girls College.

2024 The school will provide access to school Chromebooks for year 7 students who don't have their own. Year 7 students are encouraged to bring their own Chromebook.

All year 8 students will be asked to bring their own Chromebooks. There will be support provisions in place for families who may struggle to purchase a Chromebook for their year 8 child.

Please note:

From 2023, there will no longer be specific digital classes at Ōtūmoetai Intermediate School. All students with their own Chromebooks will be distributed across the school and grouped with students of similar ability.

Rationale for Change:

1. Changes to NCEA and the introduction of co-requisite requirements in literacy and numeracy will disadvantage students who arrive in year 9 ill-prepared for online exams and new literacy, numeracy standards. We are working closely with Ōtūmoetai College to review and align our student learning progressions with the new requirements at secondary level including being able to use Chromebooks as tools for learning.
2. All Tauranga secondary schools into which our students feed, require students to purchase their own chrome book for year 9.

3. By moving to an organisation where Ōtūmoetai Intermediate School year 8 students have their own Chromebooks, their families would have the following costs spread over three years:

- Entry into OIS year 7 cost: – new uniform
– stationery
– (no school fees)
- Entry into OIS year 8: – purchase Chromebook
– stationery
– (no school fees)
- Entry into year 9: – new uniform
– (already have a Chromebook)
– stationery
– subject specific fees

Understanding How NCEA Requirements Are Changing

Over the next few years, NCEA will transition from its current form into the new qualification. Here is what you need to know about transitioning to the new NCEA requirements.

Key Information

There are two changes happening to NCEA in 2023 on the current timeline. The current timeline may change in accordance with an upcoming decision on sector readiness for literacy and numeracy.

Under the current timeline, from 2023:

- The new Literacy and Numeracy | Te Reo Matatini me te Pāngarau co-requisite requirements will come into force.
- The size of the qualification will reduce from 80 credits to 60 credits.

These changes are happening for NCEA Level 1 in 2023, Level 2 in 2024, and Level 3 in 2025.
